PROFESSIONAL SUMMARY

Business Analyst who turns unclear business problems into build-ready requirements. At QWARE, I run discovery workshops, write epics, user stories and acceptance criteria in Azure DevOps, map as-is and to-be processes in BPMN, and manage change requests on Microsoft Dynamics 365 and cloud projects, in Agile/Scrum and Waterfall delivery. Backed by SQL, Oracle and Power BI data analysis, an MSc in Business and Management (Northumbria University) and Microsoft Azure AI Fundamentals (AI-900).

WORK EXPERIENCE

Business Analyst – QWARE, United Kingdom (Remote) | June 2025 – Present

- Acted as the primary link between clients, business stakeholders and a multidisciplinary development team, delivering Microsoft Dynamics 365 and cloud change from discovery to client sign-off.
- Ran discovery workshops and stakeholder interviews, turning user needs into build-ready functional requirements: epics, features and user stories with clear acceptance criteria in Azure DevOps.
- Spotted that a client's reported defect was an unspecified new requirement; aligned the client's product owner and developers, raised a change request with an impact assessment, and secured client sign-off while avoiding wasted fix effort.
- Maintained full requirements traceability from intake to delivery by creating, prioritising and assigning every work item and owning it through to client sign-off.
- Facilitated Scrum ceremonies across 2–4 week sprints and led estimation and costing sessions, sizing user stories against team capacity.
- Built Azure DevOps dashboards giving stakeholders a clear view of sprint progress, backlog health and delivery status, supporting delivery governance.
- Produced BPMN as-is and to-be process maps, user personas and stakeholder presentations, and validated delivered solutions against agreed requirements.

MSc Consultancy Project – Snorkel Europe Ltd (Northumbria University), Newcastle upon Tyne | August 2024 – January 2025

- Recommended three priority African markets for the UK-based EMEA division of a global aerial work platform manufacturer by appraising four options (Nigeria, Kenya, Tanzania and Ethiopia) against GDP, sector contribution, inflation and population.
- Built the evidence base for the market-entry recommendation by applying PESTEL, Porter's Five Forces, SWOT and VRIO analysis and assessing the client's revenue growth, operating margin and return on assets.
- Defined a route-to-market approach for each country by analysing competitors, distribution channels (dealerships, direct sales, rental and online) and customer segments.
- Kept senior stakeholders aligned throughout the six-month engagement by presenting weekly progress and the final strategy, supported by a detailed written report.

Junior Business Analyst – Indian Institute of Hotel Management & Culinary Arts (Remote, Part-time) | February 2023 – February 2025

- Informed student recruitment strategy by researching competitors and sector trends.
- Supported decisions across admissions and student services by collecting and analysing admissions and student data.
- Gave leadership regular visibility of enrolment trends and student satisfaction by building recurring reports for planning.
- Streamlined administrative processes across departments by gathering requirements from each team and coordinating changes.

Project Engineer – Wipro Limited | October 2021 – December 2022

- Resolved client-reported issues within agreed service levels by performing root cause analysis on Oracle and SQL relational databases and managing ticket assignment as part of application systems support.
- Gave team leads and clients daily and monthly visibility of ticket volumes and resolution performance by producing regular reports.
- Improved reporting processes by working with cross-functional teams to troubleshoot recurring issues.

Vice President (Volunteer) – White Volunteers Foundation, Hyderabad, India | January 2021 – Present

- Increased donations by 5% by managing donor relationships and running targeted fundraising campaigns for a school nutrition programme across 14–15 government schools.
- Delivered programmes on time and within budget by recruiting, training and coordinating volunteer teams.

EDUCATION

MSc Business and Management with Advanced Practice – Northumbria University, UK | 2025

Key modules: Strategy and Innovation, Research Methods, Business Sustainability, Business Simulation

Bachelor of Technology in Electronics and Communication Engineering – NNRG, Hyderabad, India | 2021

PROJECTS

- Business Simulation – Leger Motors (Team Manager): grew large-car market share from 1.75% to 5.65% over four simulated years by leading decisions on production, pricing, workforce, automation and distribution.
- Business Clinic Consultancy Project, Northumbria University (January – May 2024): delivered costed recommendations to three organisations, covering Newcastle United F.C.'s CSR strategy, Northumbria's start-up support and staff retention at Lamesley Childcare.

SKILLS

Business Analysis

Requirements Elicitation, Business and Functional Requirements, User Stories, Acceptance Criteria, Process Mapping (BPMN, As-Is / To-Be), Process Improvement, Gap Analysis, Impact Analysis, Change Requests, Requirements Traceability, Backlog Refinement, Estimation, Root Cause Analysis, Agile / Scrum, Waterfall, Change Management

Tools

Azure DevOps, Microsoft Dynamics 365 (CRM), Power BI, SQL, Oracle, Power Apps, Microsoft Azure, SharePoint, Excel (Advanced), PowerPoint

Analysis and Strategy

Data Analysis, Dashboards, Reporting, Market and Competitor Research, Options Appraisal, PESTEL, Porter's Five Forces, SWOT, VRIO, Financial Analysis

Professional

Stakeholder Management and Engagement, Workshop Facilitation, Presentation, Team Leadership, Problem Solving

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals (AI-900) – Microsoft, 2025.
- Agile Requirements and Business Analysis (Foundations) – LinkedIn Learning, 2024.
- Strategy for Management Consultants and Business Analysts – Udemy, 2024.
- Power BI Desktop for Business Intelligence – Udemy, 2024.
